MAY 2013 – JUNE 2014 (Hyderabad)

.NET Developer @ Telent Edge

Project: Schedule Management

Key responsibilities: Gathering requirements, implementing new features

Technologies: ASP.NET Web Forms, MS SQL Server 2008

COMMUNICATION

Getting on a call with client for gathering requirements and tracking work progress and deliveries, discussing and proposing feasible solution approaches to the client for new Integrations and features.

LEADERSHIP

As a Team Lead, I maintain a positive environment in team and for that, we do 360-degree code review and help peer developers to understand client requirements and development approach and practice writing quality code and debugging techniques to increase team's productivity, finding bugs early and easily and maintaining task and tickets for better tracking.

EDUCATION

B. TECH (Computer Science)
Quantum University (2009 – 2013)
