

Mudit Mohan Kaushik

CAREER SUMMARY

11 years of hands-on experience as a Frontend, Backend and Full stack development combine and being a good team player and **3+ years' experience as Lead**, mentoring and helping junior developers. Throughout my career, I've honed my skills in following various programming languages and frameworks.

I thrive in collaborative environments, working effectively with designers, product managers, and other developers and cross teams to translate ideas into user-friendly and efficient applications.

SKILLS

Angular
React
JavaScript
Typescript
Node.js
Microservice
Jest (Testing)
AWS Lambda
AWS EC2
Docker
CI/CD
Rust
C#
Git-Lab

ACHIEVEMENTS

- Individual Contribution Award
- Spotlight Award
- Won organization wide hackathon.

EDUCATION

- B. TECH (Computer Science)
Quantum University (2009 – 2013)
- SENIOR SECONDARY
Adarsh Bal Niketan (2007 - 2008)
- HIGH SCHOOL
Adarsh Bal Niketan (2005 – 2006)

CURRENT ADDRESS:

Sarjapur, Bangalore - 560035

APRIL 2020 – FEB 2021 (Bangalore)

Senior Full stack Developer @ Rewaa Tech

Project: Multi-channels Inventory Management System (**MIMS**)

Key responsibilities:

- Gathering requirements
- Develop and implement new features
- Create POCs for future integrations.
- Anticipate and Mitigate risk and impact analysis.
- Develop using agile methodology.
- Resolve existing bugs.
- Maintaining code and writing Unit test case.

Technologies: Angular 8, TypeScript, RxJs, NgRx, JavaScript, ES6, Nodejs, Jest, AWS Lambda, Bootstrap, MySQL

JUNE 2017 – APRIL 2020 (Bangalore)

Senior Software Engineer II @ PowerSchool LLP

Project: Unified Classroom

Key responsibilities:

- Gathering requirements from Business for product.
- **Implementing POCs** for product integration.
- Develop new product features with agile methodology.
- Collaborating with cross functional teams.
- Anticipate and Mitigate risk and impact analysis.
- Integrate third-party APIs like **Google G-Suits, Google Drive APIs**.
- Maintaining code base in **Git-lab** and deployment using **CI-CD**.
- Resolving bugs, **Writing unit test cases**.
- Mentoring junior developers and review their codes.

Technologies: Angular 6, TypeScript, RxJs, NgRx, Node.js, Bootstrap, Webpack, Chai, Mocha, Sinon, MySQL.

Highlights:

- Created Intervention module from scratch.
- Integrated Google G-suite.
- Refactored and added new features to already existing assignment module.

Achievements/Awards:

- Won organization wide hackathon.
- Implemented several successful POCs, which integrated with Unified Classroom later.

JUNE 2015 – MAY 2017 (Bangalore)

Senior Software Engineer @ Tavant Technologies Pvt. Ltd.

Project: Blink & Consumer Portfolio Landing (CPL) & Third-Party Organization (TPO).

Key responsibilities:

- Gathering requirements from Business.
- Develop new features.

- Maintaining code in **TFS (Team Foundation Server)**.
- Resolving bugs.

Technologies: ASP.NET MVC Razor 5, JavaScript, jQuery, Bootstrap, MS-SQL Server

SEPTEMBER 2014 – MAY 2015 (Bangalore)

Software Engineer @ Ejyle Technologies Pvt. Ltd.

Project: Profile Desk & Dev Accelerate ECP (Enterprise Control Panel)

Key responsibilities:

- Gathering feature requirements,
- Develop new features.
- Maintaining code in **TFS (Team Foundation Server)**.
- Resolving bugs.

Technologies: ASP.NET MVC Razor 5, JavaScript, Bootstrap, Entity Framework, LINQ, ASP.NET WEB APIs, MS SQL Server.

MAY 2013 – JUNE 2014 (Hyderabad)

.NET Developer @ Telent Edge

Project: Schedule Management

Key responsibilities:

- Gathering feature requirements.
- Develop new features.
- Maintaining code in **TFS (Team Foundation Server)**.
- Resolving bugs.

Technologies: ASP.NET Web Forms, MS SQL Server 2008

COMMUNICATION

Getting on a call with client for gathering requirements and tracking work progress and deliveries, discussing and proposing feasible solution approaches to the client for new Integrations and features.

LEADERSHIP

As a Team Lead, I maintain a positive environment in team and for that, we do 360-degree code review and help peer developers to understand client requirements and development approach and practice writing quality code and debugging techniques to increase team's productivity, finding bugs early and easily and maintaining task and tickets for better tracking.
